There is also information available online. Buzz Medical Library Education Blog MY Account Company Cart (0) The medical information needed by nurses: When, where and how do they need it? Try before buying with a 30-day free trial before being charged with a. To administer medications competently and safely. Take advantage of the renovation reminder and use it to look for a medication and, finally, pay the subscription anyway. This application is an excellent, easy and reliable tool for information on medications. The bad thing about how bad is that even if it had not renewed its subscription of annual, even if I would not use it, and now you can not do it anymore. For these reasons, it was necessary for us to become a compulsory subscription model. This application is worth the subscription fee for the nurse or for anyone who needs to look for medications frequently. Hello Mony, we understand your point of view and greatly appreciate users as you are renewed in the Honor System. The fact is that with each update of iOS, there is the potential that the problems appear in an application that must be addressed and a new compilation was released. The following data can be collected, but it is not linked to its identity: Content of the Search History history of identifiers of data diagnostic use Privacy practices may vary, for example, in function of the features you use or his age. The Complete Index Search component has saved me so much time! I also enjoy the available tools that include calculations of medicines, tables and values of The most complete nursing drug guide contains well-organized monographs for thousands of generic and trade name drugs that reflect the last approvals and changes of the FDA. The Scenics Edition: Lifeguard, at a glance: "More 5,000 drug monographs covering commercial commercial names The genetic. Á e Organized by names of genetic drugs, with an index that includes generic and commercial names, classifications, combined medications and Herbals. Á e Drug-Farmacos, Farmacos, Food, Interactions of natural products of drugs. Á e Cross -Reference of drugs. Á e Herbal content. Á e Pedi, Geri, OB and á e
