We are a group of companies specialized in the development of modular banking systems, that offer integral and flexible technological solutions to financial institutions for their fiscal, organization, and communication needs. We are pioneers in the financial software industry in Mexico and Latin America, with the advantage of having over 35 years of experience in this business. OUR SOLUTION We have developed our Integrated Financial System (SIF) based on the centralized, modular, and shared use of Core Banking System's technology. This flexible and functional tool adapts to the needs of each organization. A SIF operates using individual modules that integrate to our client's core system, eliminating the need to change their operation schemes. Our systems optimize financial and banking processes, automatize operation, administration, executive and customer service areas of banking institutions. SIF, our Integrated Financial System cover the functionality required for: Corebanking Administration (BackOffice, MiddleOffice, FrontOffice) Branches Executive Information Systems Home Banking Directed to: We serve companies such as banking institutions, foreign exchange offices, loan offices or any other activity that requires a total control of cash flow, transaction tracking, bank account tracking and safekeeping. SIF was designed for financial institutions that require tools to execute complex banking activities, without forcing them to pay the cost of specific software. Temenos T24 is an integrated core banking solution that is often referred to as "all in one" technology resource. T24 equips financial institutions with all the necessary tools for managing the entire workflow of banking operations from both back and front end in addition to client relationship management. T24 has established strong reputation in financial services market over the past 14 years. For many leading international banks, Viveo V.bank has provided a solid foundation from which to achieve highly effective and efficient operations. However, forward looking banks need to replace V.bank with a new core banking platform to create a simpler and more flexible IT environment, boost their efficiency and drive down total cost of ownership. As with any sophisticated platform, the value delivered by T24 is dependent upon the quality of its implementation and integration with a bank's existing systems and business processes. Capgemini offers comprehensive T24 implementation services that help banks unlock the full value from a V.bank migration. CORE BANKING SYSTEM (TEMENOS T24) LEAD CONSULTANTCognizant LatviaAprakstsPamatinformācijaUzņēmumsCognizant (Nasdaq-100: CTSH) is one of the world's leading professional services companies,transforming clients' business, operating and technology models for the digital era. Stay up to date with our career page Tulkot lapu uz latviešu valodu web T24 is the most technically advanced banking system in the world today. It is a 24-hour real-time banking application that provides multiple application server support to a huge number of users. The system also eliminates the need to run End Of Day processing. It ties together multiple channels, and provides CRM functionality and true non-stop processing in a single system. JS Bank has upgraded its core banking system to Temenos T24 R14. The bank has been using T24 core banking system for nearly a decade and has successfully moved all of the operations at its head office and branches to the latest version of Temenos flagship core platform. The upgrade will enhance the technology platform in line with the banks focus to improve customer experience and provide a wider range of product offerings. Commenting on the occasion, Khalid Imran, CEO JS Bank stated "Temenos Core Banking System upgrade to R14 will enable the bank to further increase its operational efficiencies and improve its compliance and risk management functions. It will also provide the Bank an advanced banking platform to position itself to launch innovative products & digital banking services for the customers". Imran Soomro, CIO JS Bank said "T24 R14 version offers an advanced & agile banking platform which bridges the fintech gap to offer rapid & customized services to the customer who prefers branch banking as well as the digital age customer". Earlier this year JS Bank opened its first branch outside of its home country, in Bahrain. The announcement followed the awarding of a wholesale banking license to JS Bank by the Central Bank of Bahrain in 2015. The Bahraini branch is also underpinned by the T24 R14 core banking system. Temenos, the software specialist for banking and finance, was recently recognized once again as the world's best-selling vendor of core banking software by the annual league. This is the 16th time in the last 17 years that Temenos has topped the league table. The system upgrade project and the technical services were performed on behalf of Temenos by Pakistan-based National Data Consultants (NDC), the vendor's regional partner. JS Bank is considered amongst the fastest growing banks within the Pakistan's banking landscape with the support of its vast experienced management. The Bank now has an online network of 278 branches and presence in over 138 cities across Pakistan. In its unrelenting effort to provide high quality products and services, JS Bank continues to pursue the path of innovation and excellence. Please visit www.jsbl.com for more information. Mr. Khalid Imran, President & CEO JS Bank and Mr. Gary Rhodes, Regional Director Temenos with the senior management of JS Bank & NDC at the cake cutting ceremony of the T24 upgrade. silent letters rules. silent letters rules in hindi. silent letters rules pdf. silent letters rules pdf in hindi. silent letters rules ppt. silent letter rules for g. silent letter rules powerpoint. silent letter rules in spanish
