Skipping lessons in i-Ready can be a tempting option for students who want to accelerate their learning process or simply bypass content they already understand. It’s important to note that while this might seem beneficial in the short term, it is essential to grasp the material fully to ensure long-term academic success. However, for those looking to understand the process, here’s a detailed description.Understanding i-Readyi-Ready is an interactive online learning program that provides assessments and personalized instruction based on students’ unique needs. The program is designed to support students by identifying their strengths and weaknesses in various subjects, then guiding them through tailored instructional lessons.Skipping LessonsOpening Developer Tools: To skip a lesson, first, open your web browser while logged into i-Ready. You will need to access the developer tools, typically by pressing Ctrl + Shift + J on Windows or Cmd + Option + J on Mac. This shortcut opens the console where you can input JavaScript codes.Using JavaScript: In the console, you will need to input specific JavaScript code. The code is typically divided into two parts. The first part must be entered to prepare the environment or set certain conditions. After pasting the first part, you might be redirected to another tab within the developer tools, usually the ‘Sources’ tab. If this happens, return to the ‘Console’ tab to continue.The second part of the code is what triggers the skip. After entering the first segment of the code, you then paste the second part. This segment is crucial as it finalizes the action of skipping the lesson.The second part of the code is what triggers the skip. After entering the first segment of the code, you then paste the second part. This segment is crucial as it finalizes the action of skipping the lesson.Activating the Skip: Once the complete code is entered into the console, you’ll execute it by pressing the enter key. Some scripts might require you to input a function like p1(your score here) which is a command within the script to bypass the current lesson with a specified score. This is a placeholder for whatever score you wish to input as your result for the skipped lesson.ConsiderationsConclusionSkipping lessons in i-Ready involves accessing and manipulating the platform’s function through developer tools using specific JavaScript commands. While this can be technically achieved, it’s crucial to weigh the ethical considerations and potential risks. Ensuring you understand the content by conventional means is generally more beneficial academically and personally in the long run.Related articles
