We have optimized the experience of Kimmy's basic attack gameplay, ensuring its most stable damage and battle performance output.3. MLBB X Transformers Skins, Optimus Prime, Bumblebee and Megatron For a limited time! 4. When you play at the tournament or the classified mythical mode, you will enter a brand new "" Mythic Battlefield "" Ok, so it's a great game, but what is with the characters that can literally stop to do anything for 5 seconds. Yes, this looks a lot, but when you also have characters who can make you fall from Max to death in a single move it really becomes annoying. Another thing that happens is when you use some characters my special moves throw me randomly case My opponent when in the case of Freya his jumped attack at times (Evan when the target is within range) gleyf or something and save at the bottom right of my radius circle what happens with that. I also fought like a 4v4 and all my team leaves every time he died at a triple annex who died or some other stupid reason and I like 15 deaths and I refer to the feeding and then I spoke of crap. Because you guys are so lazy with control because people are banned. I was perma banned twice just because my team gets all friends to signal me for everything in the book and boom of the next day we perma di ban, I love this game if there are not only many glitches that happen so often with certain characters and the player's base is worse than the devs no crime stop being lazy maybe you are trying to solve this stuff now but what has been this one Problem exactly? I know expert but you shouldn't take this for a long time I like to play this game and I've been playing for years for years, but, first of all I didn't do very well, classic, etc. Doperly because Moonton Nerfed both Chang ""and Wamwan of the main hero. I take that they are very powerful in the battlefield, but they are HP is very low, they can be easily killed by Assassins, and they need a tank next to them. Second of all, these accidents are starting to put myself in my nerves. I have iOS and every time I play a game, at least it crashes once or twice. Once back to the game, we are losing instead of winning. This really strikes The stars I worked for a while and my teammates begins to become toxic because I left. Third of all unjust players in the battlefield, at this time I am a grade and every time you enter In Epic and I put on Battlefield, 4 enemy players always go to our Buff start of the game and kill those who are looking to get the buff. This always annoys me because it ruins our training and makes things difficult p Er my team. Fourth of all when I arrive at the epic and unlock prohibition, sometimes every time I try to choose a hero that does not leave me. I try to take it out with different hero, but it doesn't work so, he crashes with Lesley, yes, I played the most of her, but I no longer have the game of her. Please correct these errors so and other players can enjoy this game. First of all let me say this game is great. I am a regular lol and hemmite player and I recommend this game over both. Why? All the gameplay and the characteristics of other similar games are boiled down and do for a compliant and pleasant furniture gameplay. Family characters and roles make it easy to enter but just as difficult to master. I performed on an iphone 6 and have very little problems with lag,this game is the mobile game for the 5v5 lol style game. So, unless you want to bring your computer with you for work, lunch, bed, dinner, break, turn by car, etc so you can play championship or punish, then download Legends furniture. It's the best in what is the biggest complaint that I feel is unfair match Making, but honestly that! 5 Mobas are and do, the match making is fast, usually right, but you are Get skirt in Couple with people who lag or change the occupied diapers or maybe just bad to the game. And from time to time you get combined with a mythical legend or team and another team will accuse you hacking. It is all a matter of teamwork and skill,lasky if you are new to the game, but not for this type of first game. idk, 30 games are skirt to be easy until you start a ranking and build your emblem set. So it gives t giving up due ita is easy, it becomes a lot Difficult to the developer, Shanghai Moonton Technology Co., Ltd., indicated that the API S Privacy Practices may include data management as described below.
