Occupying the mid-sized sedan segment is the Ford Fusion, it has been available on the market since 2005 and replaced the Mondeo in Latin and American markets. The car shares a platform with the similar but larger Ford Edge crossover SUV, they both have similar mechanical parts under the hood. You can also find the platform that the car sits on in use under the more modern European Ka model as well. The car has so far been through 2 generations of design with the second being longer than the original in length and included much additional safety technology such as blind-spot information. During the introduction of the second generation, the engine sizes available to the customer shrink in order to appeal to countries that tax vehicles based on engine displacement. Trims that were on offer to customers were also reshuffled and now people could choose from the following options: Energi Energi Platinum Energi SE Energi Titanium Platinum S SE SEL Sport Titanium The choice of a hybrid engine has been available since 2010 and has been quoted as having the best fuel economy for any mid-sized hybrid sedan. You can find owner manuals for the hybrid version of the Ford Fusion on this page among the non-hybrid version under the relevant year. The second-generation Fusion switched the battery technology from nickel-metal hydride to lithium-ion increasing capacity and reducing weight resulting in a much better MPG. In 2018 the car was discontinued but production kept running for 2 more years until July 2020 when the final Ford Fusion rolled off the production line. **FORD REMOTE - THIS PROCEDURE RESETS ALL REMOTES FOR THE VEHICLE. ALL FUNCTIONING REMOTES WILL HAVE TO BE REPROGRAMMED DURING THE PROCEDURE** There are a few different procedures that will program your remotes depending on what vehicle that you have. You can find your exact procedure in your owners manual. If you do not have your owners manual you can try any of the procedures below until you find the one that works for your vehicles Make sure that you don't press the brake pedal at any time during or before the procedure. Procedure A: 1.Close all doors, then open drivers door and press the Unlock button on driver's door while it is open, insert key into ignition. 2.Turn ignition from OFF to RUN 8 times within 8 seconds, with the 8th time ending in RUN. Door locks will cycle to confirm programming mode. (if the door locks do not cycle, then it was done incorrectly. You must start over by removing key and beginning from step 1) (Off is the position where you can remove your key, RUN is the position just shy of starting your car.) 3.Within 10 seconds press any button on the first keyless remote to be programmed. Door locks will cycle to confirm programming. If you only have one remote then skip to step 5. 4.Within 10 seconds, press any button on the second keyless remote. Door locks will cycle again to confirm programming. Repeat step 4. for all other remotes. 5.Turn ignition to OFF. Locks will again cycle to indicate end of programming mode. *If this does not work try the procedure with the door closed. Procedure B: 1. Fasten seatbelt and close all doors 2. Turn the ignition from OFF to RUN 4 times within 3 seconds. 3. Turn the ignition OFF. The system will chime to confirm programming mode. 4. Within 10 seconds, press and hold any button on first keyless remote. The system will chime once to confirm programming. 5. Within 10 seconds, press and hold any button on second keyless remote. System will chime once to confirm programming. 6. Turn ignition to RUN to exit programming mode. Please note: All steps should be performed in fairly rapid succession. If you never get the initial chime or door lock cycle, that means the vehicle has never entered programming mode. You should remove key from ignition, open and close the door and start over. Here is an example of how to program a ford key fob Thank you for choosing Ford. We recommend that you take some time to get to know your vehicle by reading this manual. The more that you know about your vehicle, the greater the safety and pleasure you will get from driving it. Driving while distracted can result in loss of vehicle control, crash and injury. We strongly recommend that you use extreme caution when using any device that may take your focus off the road. Your primary responsibility is the safe operation of your vehicle. We recommend against the use of any hand-held device while driving and encourage the use of voice-operated systems when possible. Make sure you are aware of all applicable local laws that may affect the use of electronic devices while driving. This 2012 Ford Fusion Owners Manual describes product features and options available throughout the range of available models, sometimes even before they are generally available. It may describe options that are not on your vehicle. It is possible that either Ford Motor Company or an authorized Ford dealer may have originally sold an incomplete vehicle to a vehicle modifier who upfitted it. As a result, some of the options and features on this vehicle may differ from what we describe in this manual. Note: Some of the illustrations in this manual may show features as used in different models, so they may appear differently to you on your vehicle. Note: Always use and operate your vehicle in line with all applicable laws and regulations. Note: Pass on this manual when selling your vehicle. It is an integral part of the vehicle. Note: Your vehicle's powertrain control systems can detect and store information about vehicle modifications that increase horsepower and torque output such as whether or not performance-enhancing powertrain components commonly referred to as performance chips have been used. This information will stay in the system's memory and cannot be erased even if the modification is removed. Ford Motor Company, Ford of Canada, Ford of Mexico and service or repair facilities can retrieve this information when servicing your vehicle. Ford Motor Company may use this information to determine if your warranty covers any needed repairs. Note: Some aftermarket products may cause severe engine, transmission and exhaust system damage. See your warranty information for more details. Your new diesel engine may feel, drive and function somewhat differently than a gasoline engine. Therefore, it is very important that you read and thoroughly familiarize yourself and others operating the vehicle with this guide. There is a special procedure for turning off the diesel engine. See Starting a Diesel Engine (page 176). It is important to read and understand this material in order to maintain the best service life for your engine. Ford may discontinue models or change specifications without any notice and without incurring obligations. This 2012 Ford Fusion Owners Manual may qualify the location of a component as left-hand side or right-hand side. The side is determined when facing forward in the seat.
