A height of 600 mm is the best from drainage or other considerations. Read More: Minimum Ceiling Height Standards For Residential House 8) Standard Parapet Wall Size Parapet walls and hand-rails provided on the edges of roof terraces, balcony, verandah, etc. shall be not less than 1.05 m and not more than 1.20 m in height from the finished floor level. 9) Standard Boundary Wall Size The requirements of the boundary wall are given below: Compound Wall Except with the special permission of the authority, the maximum height of the compound wall shall be 1.5 m above the centerline of the front street. Compound wall up to 2.4 m height may be permitted if the top 0.9 m is of open type construction of a design to be approved by the authority. In the case of a corner plot, the height of boundary wall shall be restricted to 0.75 m for a length of 10 m on the front and side of the intersection and the balanced height may be made up of open type construction (through railings) and of design to be approved by the authority. 1. Area Limitation The limitation of the area and height of the buildings of different types of construction and occupancy is achieved by satisfying the floor area ratio (FAR). FAR is taking into account the following aspects: Occupancy class, type of construction,Width of the street fronting the building and the traffic loadThe density & Locality where the building is proposed and.Parking facilitiesLocal fire fighting facilitiesWater supply and drainage facilities. Floor Area Ratio(FAR) = (Total cover area of all floors/ Plot area) The floor area ratio for residential buildings is ranging from 1.0 to 2.0 depending on the type of construction. It restricts the height of the building and the number of stories provided. For example, if a plot measures 15 m x 20 m and building bye-laws stipulates permissible FAR as 2.00, then the maximum built-up area which can be put on the plot is 600 m2. If the area covered at ground floor is 150 m2, the total number of floors that can be constructed is (600 / 150) = 4 Floor Space Index (FSI) Thus, with these bye-laws, the height of the building cannot be more than 4 stories. FAR is also used in classifying the type of construction on the basis of restriction offered by building against the fire Read More: FSI Calculator 2. Height of the Building The height and number of the story for a building are related to FAR and the provisions of open spaces are already explained earlier. Where the building height is not covered by FAR, the maximum height should be limited to the width of the street as follows. (i) The maximum height of the building shall not exceed 2 times the width of the road abutting plus the front open space. (ii) If a building abuts on two or more streets of different widths, the building shall be deemed to face upon the street that has the greater width and the building height shall be regulated by the width of that street and may be continued to this height to a depth of 24 m along the narrower street subject to the conformity of open spaces. (iii) In the vicinity of aerodromes, the maximum height fixed in consultation with civil aviation authorities. Appearance like a water tank on the roof, ventilating and air conditioning appliances, lift room, chimneys and parapet walls not exceeding 1.2 m in height are not included in the height of the building. However, it is standardized for living rooms to a size min. of 330 sq feet or 30m2. Master Bedroom is generally considered to be well spaced if each side of the room is at least 15 feet. However, the size is decided as per need of homeowners. The standard room size or the average room size in Nigeria is between 4.2 m2 to 4.5m2. However bigger houses up to 7.2m2 can also be found, belonging to financially rich citizens of Nigeria. 7 x 10 sq feetFor the living room to be adequate with respect to the size 7 by 10 is the sufficient area. Furniture can be well adjusted and open space will be sufficient within this area. One can also provide an extra 3 to 4 feet area for circulation. However, the mentioned size is enough for a good living room.
