## How to activate cubase license

See more Steinberg Support Updated April 27, 2021 18:13 Follow For current information on used Activation Codes for Basic FX Suite licenses that came with a Steinberg interface, please click here. You want to activate a license for Steinberg software you've just installed? Learn about the difference between activation and reactivation. Activation With an unused activation code you can activate your software right after the installation. After entering the code in the eLicenser Control Center (which will be installed along automatically with your Steinberg software), the license will be downloaded and stored on your computer or a connected USB-eLicenser (dongle). If the license has already been stored on a USB-eLicenser, activation is neither necessary nor possible. In this case, it is sufficient to connect the USB-eLicenser after the installation has been completed. Click the button below to read more on activation. Reactivation The reactivation allows for requesting new activation codes for already registered licenses. This is necessary, if the initially received activation code has been used already and you need to activate a new installation of your software - for example, after you have switched to a new computer or in case the operating system has been reinstalled. Exception: If the license is stored on a USB-eLicenser, activation is neither necessary nor possible. In this case, it is sufficient to connect the USB-eLicenser after the installation has been completed. Click the button below to read more on reactivation. Was this article helpful? 0 out of 0 found this helpful Still haven't found what you're looking for? Our help center provides solutions for almost any known issue. If you cannot find an answer to your question please submit a support request using the link below. Submit a ticket Step 1: Register your qualifying Line 6 product at . After you register your qualifying product, you'll see a message like this: Thanks for registering your Line 6 Product! The product you registered is eligible for Cubase LE. Your Cubase LE download access code is: 11BE6-PK03M-8B53R-1XX7D-XXXX. In order to obtain your software download, please click the MySteinberg link below and follow the onscreen instructions. The download access code is only valid once but you can always find it in your Line 6 account's Purchase History. Step 2: Follow the Steinberg link. You'll be prompted to login or create a new account. o If you create a new account, Steinberg will send you an account activation email. Step 3: Register the code. Copy it from your Line 6 account's Purchase History, if needed. o The code registration page can also be reached from the 'My Products' section of your Steinberg account. Step 4: Download the software from the next screen which shows a new code titled 'Activation Code for Cubase LE Student Starter Pack', along with download links for Windows and Mac. With Cubase LE 8 registered in your MySteinberg account, you can find all necessary files for a complete installation under "My products" -> "Downloads". If you are a Cubase user and accustomed yourself to make use of all its features and functions for producing music at home, you will probably like to extend its use if you have multiple computers in your home. There are three ways to install Cubase on a different computer. First, you can buy multiple licenses. Second, you can transfer and reactivate the license on the computer you are using. Last, you can buy a USB e-Licenser dongle that instantly activates the license on any computer you are using. Three Ways to Install and Use Cubase on a Different Computer In case you upgrade to a new computer, buy an additional laptop, or your old computer fails to operate, you can still install Cubase on multiple two or more computers. However, the catch is that you will have to deactivate Cubase on your old hardware to use it on your new device. It is only possible to have the Cubase license installed on one computer at a time, and there are three ways to do it. Buying multiple licenses for all your computers The first way is to buy multiple licenses for all of your computers. (The expensive way) Cubase is not cheap, and purchasing it a second time is not practical for the average home music producer. However, if you have the money to spend, no one will stop you from purchasing Cubase for your second or third computer. Installing and reactivating the license The second way is to transfer and reactivate licenses on the computer you are using. (The tedious way) I don't recommend this method if you will constantly be switching back from computer to computer. However, if you are replacing your old computer with a new one, or if you are reinstalling your OS on the same computer, you will only have to do it once. Reactivating Cubase license on the same computer All you need to do is log into your Steinberg account, and click on the "Reactivate" button—don't worry because you won't miss it. It is in the middle of the screen. It will take you to the Reactivation menu, and from there it will ask you to choose your eLicense from the list. It is super easy. However, it is still a lot of work if you are switching back from computer to computer—especially if you somehow lose your license, which happens to the best of us. Reactivating Cubase on a new computer Now, this is the tedious part. If you want to use Cubase on a new computer, you will have to download and install eLicenser Control Center on your new computer, register and get your new license number, and finally, reactivate your license by entering the new activation code. Imagine doing this process every time, it can be very frustrating! Lucky for you, I did some research and discovered a way to make things easier. I will show you a third way—buying a USB e-Licenser dongle to transfer licenses instantly without an internet connection. (The quickest and inexpensive way) 5 Easy Steps to Install Cubase on a different Computer Using a USB e-Licenser Dongle #1: Install Cubase eLicense Control Center on all of your computers The first step you need to do is install the latest version of the Cubase eLicense Control Center on all the computers you want to use for Cubase. You can install this software on multiple computers for free. However, you cannot use Cubase on these computers simultaneously. You can transfer the license on the computer you are using by using an eLicense dongle and start working with Cubase on the computer you want to use. #2: Get an eLicenser USB dongle Keep in mind that USB eLicenser dongles are not the same as regular USB flash drives. You will need to get the specific USB dongle that is made explicitly for transferring licenses. Yes, you read that right—they do make those kinds of things, which in my opinion is pretty neat and only logical. #3: Transfer the eLicense from your old computer to the USB eLicenser dongle To transfer the existing license to your USB eLicenser dongle, open the Cubase eLicense Control Center on the computer that has the existing license. Click on the license and drag it into your USB folder, as soon as it is transferred to the USB dongle and the USB device ejects, the license is already transferred. And you wouldn't be able to use Cubase on that computer anymore. #4: Connect the eLicenser USB dongle to the new computer or any computer you will use Now that the license is on the USB eLicenser, all that is left to do is connect it to your new computer. Make sure that Cubase and the eLicenser control center are installed on the new computer for it to work successfully. Once everything is installed, you can open Cubase and start working using the new computer. #5: Open Cubase to see if it works Connect the USB eLicenser to the new computer and see if it works. It should work without doing anything other than inserting the flash drive. It is the most convenient way to install and use Cubase on a different computer without going through the tedious reactivation process that can only do if you are connected to the internet. USB eLicenser Information! It is very easy to use Cubase on a different computer if you have the right USB dongle. However, there are still some limitations to transferring licenses. You can only transfer eLicenses from the eLicense Control Center using the USB eLicenser. Other variations of these USB dongles, including regular USB flash drives will not work. Transferring the eLicense is not the same as multiplying the license. Once you eject the USB device from your computer, the license will no longer work—even if you try copying the license back to the Soft eLicenser tool. You cannot transfer licenses from a USB eLicenser to a Soft eLicenser installed on your hard drive. You cannot transfer licenses by using the internet, you will need the physical dongle. However, if you have the eLicense stored on the USB, you can activate Cubase on any of your computers anytime—even without connecting it to the internet and reactivating the license over and over. Conclusion If you have multiple computers and you want to use Cubase on all of them, just remember to follow the method I showed you above. It is the easiest and less expensive method that I strongly recommend if you want to install Cubase on a different computer. If you still don't want to go through the process, you can always buy Cubase for the second or third computer. Having two Cubase licenses might be expensive, but it will allow you to use Cubase simultaneously on both computers—which can probably help your workflow as a pro music producer. It is not necessary for beginners to spend that much money though—I would probably suggest following this method and use that extra money for more music gear or other VST plugins. link to Is Reaper Free After 60 Days? The Answer Is Surprising link to ReaPlugs: The 10 Best (stock) Reaper Plugins You Must Check Out Thank you for registering with ARC and redeeming our exclusive Steinberg offer. You should have received an email with your unique 25 digit Download Access Code. Please find the instructions on how to download, install and activate your copy of Cubase LE 10 and Retrologue 2. The process is the same on both Mac and Windows. Video Instructions Written Instructions 1. First head over to www.steinberg.net/gettingstarted and either log in if you already have an account or create a new Steinberg user account by hitting the "Create Steinberg ID" button. 2. After logging in, you will be presented with a screen prompting you to enter your unique Download Access Code. Enter your code and hit continue. 3. After your download code has been accepted, you will be given two 32 digit unique Product Activation Codes, one for Cubase LE 10 and one for Retrologue 2. You will also get the download link for the Steinberg Download Assistant for both Mac and Windows. Click the appropriate link and wait for the download to finish. You will only need to click on one of the links for your operating system. Please keep your Product Activation Codes safe as you will need them later. However, if you lose them, do not worry. Steinberg will have also emailed the codes to you. 4. Once your download is completed, run the Steinberg Download Assistant Setup and follow the installation process through. 5. Launch the Steinberg Download Assistant after the installation is completed. Go to the Cubase tab on the left, select Cubase LE 10 and press the Download button for the full Cubase LE 10 application. 6. After the download completes, press Open and run the Cubase LE 10 installer. Follow the on-screen instructions to complete the installation of Cubase LE 10. This setup will install the Steinberg eLicenser Control Centre as well, which will be used to activate your Steinberg products. 7. Now open the Steinberg Download Assistant again, go to VST Instruments & Plugins tab on the left, select Retrologue 2 and press the Download button for the Retrologue 2 plugin. 8. After the download completes, press Open and run the Retrologue 2 installer. Follow the on-screen instructions to complete the installation of Retrologue 2. 9. Launch the Steinberg eLicenser Control Center from your applications/programs, click Enter Activation Code from the top left corner, enter your Cubase LE 10 Activation Code and press Continue. Select the eLicenser where you would like the Cubase LE 10 License installed and press Download License. For more information on eLicenses, please follow this link. 10. Repeat step 9, but this time using your Retrologue 2 Activation Code. After that, you should see both your Licenses in the eLicenser Control Centre. 11. Done! Both Cubase LE 10 and Retrologue 2 are now installed and activated on your computer, so all that is left to do is get creative with your new Steinberg software. Top reviews Most recent Top reviews Apparently we're still in the 90's as we go into 2021 with these guys. I have eLicenser 6.12.5.1278 which is the latest according to Steinberg's own website but I just get The currently installed version of the eLicenser Control (eLC) software is too old trying to activate Cubase 11... anyone else having issues? Page 2 63 comments Each Vienna Symphonic Library product comes with a dedicated license. These licenses are stored on a USB eLicenser key (also called "dongle") like our ViennaKey. Alternatively to the ViennaKey, you can also use a Steinberg or Arturia Key, if you have one or can get one faster (they are usually available in music stores, and it's the same copy protection system, "eLicenser"). After purchasing a product from our VSL web shop we will send you an Order Confirmation Email to your registered email address. Follow the instructions from your email to start the easy and automatic installation process. If you prefer to activate your licenses manually start the eLicenser Control Center Software and user your activation codes there. 0.17: Find your product information overview at MyVSL/MyPRODUCTS. 0:34: Download and install the latest version of the eLicenser Control Center. 0:40: Open the eLicenser Control Center Software and click "Enter Activation Code". 1:08: Reveal the Activation Code for your product at MyVSL/MyPRODUCTS by pressing the little "i" icon and copy your code via shortcut or right-click. 1:22: Paste the Activation code into the first field inside the eLicenser Control Center dialog and confirm by clicking the Continue button. 1:31: Click "Download License" and wait for the license to be downloaded onto your ViennaKey. Moving licenses between eLicenser USB keys is simple: 0:29: Open the eLicenser Control Center (free download here) 0:48: Connect both keys to your computer 1:00: Select the key where the license(s) you want to transfer are stored 1:16: Drag the license(s) from one key to the other key Our products come with 1 license per purchase. Get in touch with sales@vsl.co.at, we do offer secondary studio licenses for our bigger collections at a reduced price. This depends on your setup: If you use VE Pro 7 on one computer only, you will only need one license. If you want to use VE Pro in a network, you will need additional licenses which you can purchase at a reduced price. For a network setup: Every computer that runs a VE Pro SERVER (and lets you load plug-ins in that server) will need one license and one ViennaKey or other USB eLicenser (you can also use a Steinberg Key, if you already have one or can get it faster). You will NOT need a ViennaKey on your master computer if you don't plan to use the VE Pro Server on the master computer. The VE Pro plug-in that connects from your sequencer to the available servers in your network does not need a license to run. ViennaKeys come with a 2-year hardware warranty that covers malfunctions that occurred without extraneous causes. And of course we know that you will be careful with your protection device(s), still: It can happen, hardware can break. WITH Vienna Protection Plan WITHOUT Vienna Protection Plan Report Report your lost, stolen or broken ViennaKey which held a Vienna Protection Plan license. Report your lost, stolen or broken ViennaKey. Immediately Receive a 50 hours Vienna Emergency License right away that you activate on a spare ViennaKey. Support will contact you Continue your work, our support team will look into your case. Our support team will look into your case and will get back to you. Broken Key You'll receive permanent replacement licenses as soon as possible, free of charge. You have to send in the key. Each replacement license will be available for € 20 (min. € 30). Broken Key w/ warranty You'll receive permanent replacement licenses as soon as possible, free of charge. After we have examined your damaged key you'll get a replacement key, free of charge. Hardware warranty is 2 years, from date of purchase. After we have examined your damaged key you'll get a replacement key and replacement licenses, free of charge. Hardware warranty is 2 years, from date of purchase. Lost / Stolen Key You'll receive permanent replacement licenses as soon as possible, free of charge. To meet you in the middle, you can purchase replacement licenses with a 50% discount on the list price. Reactivate Protection Purchase a new Vienna Protection Plan to re-activate your protection. It will be a good idea to purchase a Vienna Protection Plan. To have you covered under all circumstances, we have established the Vienna Protection Plan. This option will be especially helpful if you are travelling a lot, but also if you are working in a dynamic environment. If you choose not to get a Vienna Protection Plan, our ViennaKeys still come with a 2-year hardware warranty that covers malfunctions that occurred without extraneous causes. The transfer of a Vienna license to another user is not possible without our involvement and permission. Vienna Symphonic Library allows a license transfer under certain, regulated circumstances. The procedure is as follows (from the seller's perspective): The handling fee for the license transfer is 10% of the full price of the product (minimum fee EUR 50). Upgrade discounts and student discounts that may have been received at an earlier time will have to be refunded to the Vienna Symphonic Library. The seller announces the name and email address of the user the license should be transferred to in an email from his registered email address with us to sales@vsl.co.at. Kindly note that we don't allow reselling in our own forums, or through platforms like eBay or similar, so you'll have to find a buyer privately. Hand over the registered ViennaKey or other eLicenser USB key which contains the product licenses. In case there are unused activation codes, these have to be handed over to the new user as well. If your key also holds other licenses, you will want to transfer your VSL license that you want to resell to an empty key which you then give to the new user. Note that it's not possible to hand over the license without a physical ViennaKey / eLicenser USB Key. Kindly note that it's not possible to transfer licenses that have already been downloaded to a key via internet from one key to another. The new user has to register as a user on our website and confirm that he has received the material listed in 3) to finalize the transfer. The legal buyer of 'second hand' products of the Vienna Symphonic Library has full access to our support, software updates and sample downloads - he can even take advantage of our upgrade discounts with future orders. For any license transfer inquiries, please contact us directly via sales@vsl.co.at!
