How to activate cheats in gta 3 android

Current Version: 5.2.0Requires Android: 2.2 and upCategory: Toolsv5.2.0 update:5.2.0 (2014-03-18)Please reboot and email us when have problem after update-[new] custom Keyboard and Virtual Mouse toggle key-[new] Joymouse: right stick move cursor, button A click-[new] Auto Profile: auto load App Profile when call up Keyboard-[new] separable Dpad-[bug] temp fix for some 4.3/4.4 devicesOther Recent Changes:-Virtual Mouse mode-use mouse button, hide mouse cursor-tap screen to toggle keyboard ("Use Hotspot")-move uncommon options to "Internal Options"Overview:Soft keyboard tailor-made for playing games. Play keyboard/gamepad-only games with touchscreen (e.g. Flash, Xperia Play or Onlive games), play touch-only games with physical gamepad (e.g. Street Fighter IV HD), or play touch/gamepad-only games with normal keyboard.For any issue (e.g. initial setup problem, call up gamepad in games, config touchscreen control, enter cheat code in GTA) please contact developer at android.locnet@gmail.com[Credit to TLrtheory for the demonstration video]Main Features=====1. onscreen gamepad with: multi-touch (depends on device and OS)- 4/8-way d-pad, up to 12 game buttons, 2 analog sticks- resizable and customizable buttons layout- fully configurable buttons mappings2. re-map physical keys3. save key/button mappings to profiles4. full qwerty keyboard5. create macro to perform autofire, combo keys, action sequence, and text input with single button hit6. emulate Xperia Play and Onlive Controls7. emulate Touchscreen action, even work with devices with no touchscreen (e.g. Minix Neo X5) (need root)8. emulate real Analog Joystick (need root, and OS joystick support)9. control Analog Sticks with keysController Compatibility=====This app allow user to control games with:- Touchscreen- Accelerometer- Mouse (need root)-BlueZIME-compatible Bluetooth keyboard/controller (e.g. PhoneJoy, iCade, Wiimote)- OS-compatible Bluetooth keyboard/controller (e.g. keyboard/controller connected to OS 4.2 as HID device, such as iCade, iPeGa) *- OS-compatible USB keyboard/controller (e.g. Xbox 360, generic keyboard, some generic controller) *- virtual controller emulated from 3rd party tools (e.g. Moga Universal Driver system-mode, Sixaxis bypass-ime mode) *- Xperia Play in Gingerbread (touchpad support need root)- built-in gamepad of various gaming devices (e.g. Droid X360, JXD S5110, Yinlips G18A)* reading analog input requires root access unless connecting controller through BluezIMESoftware Compatibility=====This app is originally provided as an add-on for our emulators, but now works with many other apps. Not all apps are compatible, so please test during the trial period. For Motorola Bionic user, there is a ROM issue where many features only work with apps which are explicitly designed to work with soft keyboard.For best compatibility we recommend using BlueZIME-compatible controllers when physical controller is needed. Some compatibility issues can be solved with the help of root features, please contact us if you have problem.How to call up GameKeyboard=====Depends on device, ROM and target app there are many different ways to call up soft keyboard, e.g.- some apps have built-in option to call up soft keyboard- some devices support using long pressing [Menu] key to call up soft keyboardGameKeyboard also provide two methods in case the above cannot be used:- switch to GameKeyboard Launcher, tap on the "call out keyboard after exit" button, then switch back- turn on "Settings->[Vol. Up] Key Action" then use [Vol. Up] as hotkeykeyword: DOS AndDOSBox DOSBox Amiga AnUAE4All UAE4All C64 ANVICE64 VICEDownload via Google Play:GameKeyboard 5.2.0 on Google PlayDownload :Download GameKeyboard 5.2.0 AFTER INSTALLING GAME KEYBOARD: Open and follow the below instructions: So ignore # 2, 5 and 6 of this guide, Simply configure GameKeyboard, set it as default input method, start GTA 3 and press Vol+ to enter the cheats.2. Put shortcuts to both GameKeyboard and GTA III on your device's desktop; 3. Start the app, tap & hold "Step 2: Tap here, then long press...", and select GameKeyboard as input method (you can chose any other keyboard, but stick to GameKeyboard, see #4); 4. Configure GameKeyboard. Important: configure at least one button to respond to "Enter", so you can resume your last game and actually begin playing (for some obscure reason, GTA won't respond to any virtual keyboards' Enter button, at least as far as I have tried); you might also want to select "Swipe Left/Right Action", set transparency and button size: 5. Now, below "Step 4", select "(Optional) Tap here to call out keyboard after exit"...6. ...so you get something like this:7. Start GTA III, hit the key you configured as "Enter" until your last savegame is resumed:8. Once ingame, either swipe left or right across the Gamepad or press and hold (!) the back key for two seconds:9. Either way, you'll end up seeing a transparent virtual keyboard. *Slowly* enter your cheats (e.g. Money cheat) - don't tap too fast or the cheat won't be recognized:That's it! You can even control GTA with GameKeyboard, but it's very clumsy IMO and frequently leads to crashes (in addition to the usual ones). I've yet to find a safe way to invoke it while playing (NOPOLICEPLEASE...); the game crashes on me as soon as I hold the menu button to switch to the GameKeyboard app.One strange thing I've encountered so far: the tank cheat doesn't work; "GIVEUSATANK" only makes different cars fall out of the sky . The tank cheat does work, but it's a bit tedious: you have to keep entering the cheat until the Rhino appears; but before it does, all sorts of cars will fall out of the sky. Once you see the ice cream truck and a short while after that the police car, it's not far :)That's it! Have fun This page shows all the available cheats in Grand Theft Auto III. They are activated by a button/key combination. Cheats can be inputted into the game at anytime during gameplay, including in the pause menu. A successful input of a cheat, either activated or deactivated, will display a "Cheat activated" message. Cars will only spawn on the closest car path node, not in front of the player: Some cheats can be disabled by reinputting the cheat code, some can be disabled by reloading the game, but only the pedestrian hate and riot cheats are permanent and cannot be reversed if the game is saved while the cheat is active. These pedestrian-related cheats may hinder progress during missions. Effect PS2 PC/Android Xbox Replenish player health; if driving vehicle, replenish health of vehicle GESUNDHEIT Replenish player armor TURTOISE (1.0 version) TORTOISE (1.1 version) Acquire all weapons Note: For this cheat on the Android version, there is no confirmation message. GUNSGUNSGUNS Acquire \$250,000 in cash IFIWEREARICHMAN Spawn a Rhino GIVEUSATANK Blow up/explode/destroy all vehicles, excluding police-controlled helicopters and NPC Dodo BANGBANGBANG Low gravity for cars, cars control like plane in air CHITTYCHITTYBB Only the wheels of cars are visible ANICESETOFWHEELS Increase grip on ground, boost jump ability in all cars, disables unique stunt jumps CORNERSLIKEMAD Increase wanted level by two stars MOREPOLICEPLEASE Remove all wanted level NOPOLICEPLEASE Light clouds SKINCANCERFORME Stormy weather ILOVESCOTLAND Foggy weather PEASOUP Overcast weather ILIKESCOTLAND Increase game speed by 2, up to x4 normal speed TIMEFLIESWHENYOU Decrease game speed by half, down to x0.25 normal speed BOOOORING Speed up game clock MADWEATHER Pedestrian riot Note: Once the cheat is activated for the first time, it will cause a permanent but irreversible in-game effect, thus making the cheat impossible to be deactivated. ITALLGOINGMAAAD Pedestrians hate Claude Note: Once the cheat is activated for the first time, it will cause a permanent but irreversible in-game effect, thus making the cheat impossible to be deactivated. NOBODYLIKESME Pedestrians (except prostitutes and street criminals) carry weapons WEAPONSFORALL Play as pedestrian Note: Re-type the cheat again in a very fast period of time will change the player model back to Claude. ILIKEDRESSINGUP Gore mode Note: For this cheat, there is no confirmation message. NASTYLMBSCHEAT Video Trivia The "Destroy all cars" and "Acquire all weapons" cheats will be triggered again for every time "bang" and "guns", respectively, is typed again. So, if the player types "bang"/"guns" 15 times in a row, the cheats will be activated 15 times. Inputting any cheats will not decrease or increase the player's criminal rating, unlike other GTA games. "GESUNDHEIT" cheat code is a German word meaning "Health" In the Android version, typing "GIVEUSATANK" will give the player any car. When riot mode is activated, paramedics are sometimes affected by the cheat, which will prevent them from reviving pedestrians and they will start fighting like everyone. For some reason, they almost always attack Claude first when turning hostile. GTA 3 remains a very special game for Grand Theft Auto fans, after all, this was a game that changed games in the open world forever and was the first game in the series to adopt 3D graphics. Originally released for the PS2 (in October 2001), later arriving on the PC and the first Xbox, today it is available on PlayStation Store for PS4 and can be played on PS5 thanks to backwards compatibility. The game is also available for PC, through Steam, and for iOS and Android devices through the App Store and Google Play, respectively. Despite its age, it remains a fun game and, with cheat codes in the mix, the fun is potentially much greater. What do you need to know about GTA 3 codes / cheats? As GTA 3 is available on different platforms and each one slightly different in the controls, the code list is divided into sections, each dedicated to the respective platform. The codes we have here are valid for PC, PS5, PS4, PS2, Android and iOS. It is important to note that using codes or cheats can corrupt your recording file, so our recommendation is that you never record the game after activating a cheat. Furthermore, unlike codes for GTA 5 or GTA Online, you don't need to open a menu or anything to activate these cheats. Simply type in the codes or press the appropriate buttons and watch the on-screen warning to confirm that the code has been activated GTA 3 - Codes / Cheats for PS2, PS3, PS4, and PS5 Cheat Code for PS2, PS3, PS4, and PS5 Increase Wanted Level R2, R2, L1, R2, -, -, -, - Decrease Wanted Level R2, R2, L1, R2, 1, 1, 1, 1, 1 All Weapons R2, R2, L1, R2, -, 1, -, 1, -, 1 Receive Money R2, R2, L1, L1, -, 1, -, 1, -, 1 Complete Armor R2, R2, L1, L2, -, 1, -, 1, -, 1 Full Health R2, R2, L1, R1, -, 1, -, 1, -, 1 Slow motion TRIANGLE, 1, -, 1 SQUARE R1, R2 Fast Camera TRIANGLE, 1, -, 1 SQUARE L1, L2 Time Goes Faster CIRCLE (x3), SQUARE (x3), L1, TRIANGLE, CIRCLE, TRIANGLE Improve Driving R1, L1, R2, L1, -, R1, R1, TRIANGLE Summon the Tank CIRCLE (x6), R1, L2, L1, TRIANGLE, CIRCLE, TRIANGLE Make Vehicles Invisible L1, L1, SQUARE, R2, TRIANGLE, L1, TRIANGLE Destroy All Cars L2, R2, L1, R1, L2, R2, TRIANGLE, SQUARE, CIRCLE, TRIANGLE, L2, - Flying car -, R2, Circle, R1, L2, 1, L1, R1, Bloody Mode SQUARE, L1, CIRCLE, 1, L1, R1, TRIANGLE, -, L1, X Change Skin -, 1, -, 1, L1, L2, 1, -, 1, - Riot mode 1, 1, -, 1, X, R1, R2, L2, L1 Pedestrians Fight Each Other 1, 1, -, 1, X, L2, L1, 1, 1 All Pedestrians Have Weapons R2, R1, TRIANGLE, X, L2, L1, 1, 1 Pedestrians Fight With You 1, 1, -, 1, X, R1, R2, L1, L2 Clear weather L1, L2, R1, R2, R2, R1, L2, TRIANGLE Weather with Fog L1, L2, R1, R2, R2, R1, L2, TRIANGLE Cloudy weather L1, L2, R1, R2, R2, R1, L2, SQUARE Rainy weather L1, L2, R1, R2, R2, R1, L2, CIRCLE GTA 3 - Codes / Cheats for PC Cheat PC code Increase Wanted Level MOREPOLICEPLEASE Decrease Wanted Level NOPOLICEPLEASE All Weapons GUNSGUNSGUNS Receive Money IFIWEREARICHMAN Complete Armor TORTOISE (or TURTOISE) Full Health HEALTH Slow motion BOOOORING Fast Camera TIMEFLIESWHENYOU Time Goes Faster MADWEATHER Improve Driving CORNERSLIKEMAD Summon the Tank GIVEUSATANK Make Vehicles Invisible ANICESETOFWHEELS Destroy All Cars BANGBANGBANG Flying car CHITTYCHITTYBB Riot mode NASTYLMBSCHEAT Change Skin ILIKEDRESSINGUP All Pedestrians Have Weapons WEAPONSFORALL Pedestrians Fight Each Other ITALLGOINGMAAAD Pedestrians Fight With You NOBODYLIKESME Clear weather SKINCANCERFORME Weather with Fog PEASOUP Cloudy weather ILIKESCOTLAND Rainy weather ILOVESCOTLAND GTA 3 - Codes / Cheats for Mobile (iOS and Android) The codes / cheats for GTA 3 on iOS and Android versions are exactly the same as the PC version, however, to enter the codes in the game you need a keyboard. The only way to do this is to download a third-party application that allows you to use a keyboard over the game, so that you can enter and activate cheat codes. There are several applications with the desired effect, but at the moment, the one with the best reputation is the GamePad from FishSix Looking for more codes or cheats for other Rockstar games? Check the code list for Red Dead Redemption 2, all the cheats for GTA San Andreas, all the cheats for GTA 4, and the code list for GTA Vice City, and the complete list of tricks, cheats and codes for GTA 5. Who else out there is completely hooked on the Grand Theft Auto III 10th anniversary edition? I am. I'll admit. The only thing missing from my gameplay experience has been cheat codes. Rockstar Games tried to dash my hopes last month when they said that the iOS/Android mobile version of the game doesn't support cheat codes (along with custom mods, soundtracks, or mapping to external controllers). Boo hiss. Turns out that's not quite true. The mobile version of the game is a port from the PC version, and includes the same files and folders. When gamers discovered this they were able to apply mods created for the PC version to Android easily. Knowing this, I wondered if the cheat codes were the same as well. Turns out yes. Members of GTA Forums discovered that most of the PC codes work on the Android version. You just need a keyboard to enter them. I fired up my Logitech Bluetooth keyboard and gave it a try. I was able to apply cheats either while in the live game or in the menu screen by typing them in, just like on the PC. Huzzah! Sometimes you'll see "Cheat Activated" in the upper left corner or hear a sound that indicates success, sometimes you won't. If you don't have an external keyboard you can still get in on this. On Android phones you can bring up the keyboard by pressing and holding the Menu button. If you don't have this button (oh ICS...) or are using an Android tablet, download GameKeyboard. It offers a lot of nice extras for mobile gamers, including a virtual DPAD, mapping, and more. Unfortunately, there isn't a similar utility for iOS that I've found. For that you may need to go the external route. Another sadness is that not all of the cheat codes work. Most do, but for whatever reason some just won't activate or don't do what they're supposed to. Here's a list of the cheat codes pulled from CheatCC. I bolded the ones I know work and made red the ones that I know don't. All weapons: gunsgunsguns (enter multiple times for more ammunition) Extra money: ifiwerearichman Full health: gesundheit Higher wanted level: morepoliceplease Lower wanted level: nopoliceplease *Tank (Rhino): giveusatank - For whatever reason, this does not spawn a tank, just a random car. Destroy all cars: bangbangbang Change costume: ilikedressingup Crazy pedestrians: itsallgoingmaaad All pedestrians attack you: nobodylikesme Pedestrians fight each other: weaponsforall Time advances quicker: timelifeswhenyou Very fast game clock: madweather Faster game play: booooring 100% armor: turtle Clear weather: skincancerforme Cloudy weather: ilikescotland Rainy weather: ilovescotland Foggy weather: peasoup Invisible cars; wheels only: anicesetofwheels Flying car: chittychitttybb Improved car handling: cornerslikemad Gore mode: nastylmbscheat Let me know which cheat codes you got working in the comments.
