Any DomBrowser I Laptop Image by Angie Lingnau from Fotolia.com Odt by is the file format for Open Text Document, a format used for text processing documents in open code programs such as OpenOffice and GoogleDocs. To convert an ODT document to an XLS (Microsoft Excel Spreadsheet (XLS) file, you must first convert the file to a simple text document, which Microsoft Excel can read. Excel will use the text import wizard to format the text document in an editable spreadsheet document. There are several ways to convert your ODT file to the text - using OpenOffice, Microsoft Word or a free online converter. Convert the ODT file to plain text (txt) using a free online converter, which may be the most efficient way to make conversion if you do not have any text processing software. Open a web browser and log on to a free file conversion site (see Resources). Click "Browse" to select the ODT file of your computer files that you want to convert. Select "txt" to the output format. Then click "Convert." Some converters also require you to enter an email address once you will send the document converted by email. Download and install OpenOffice, if you do not have it. You can use the free program, not only to create ODT files, but convert them to other types of documents. Open OpenOffice Writer and click "File" and "Open" to open the Odt file you want to convert. Click "File" again and then "Save As." Enter a file name for the document and choose a destination folder. In the "Save As Type" list, select "Text (.txt)" and click "Save". Convert the ODT file using Microsoft Word, which will work so well as OpenOffice. Open word. Click "File" or the "Microsoft Office Button" (Word 2007). Click "Open". Select "OpenDocument text" in the "Files of Files" list. Browse your files to select the ODT file and click "Open". Click "File" or "Microsoft Office Button" again and click "Save As." Enter a file name and choose a destination folder to the document. In the "Save As type" list, select "Simple Text". Click "Save". Open Microsoft Excel. Click "File" or the "Microsoft Office Button", depending on your Excel version. Click "Open". In the File Type list, select "Text Files." Select the text file you just saved and click "Open". Excel will automatically start the Import Wizard, text where you can customize how excel matters the file. Select the data type in your text file in "Original Type of Data." Choose "Delimited" if your text fields are separated by certain characters. Click "Next". Choose the delimiters contained in your data that the values separates. For example, if you want to separate text fields by tabs in the files, select "tab". Look at the data view at the bottom of the dialog box to see how the worksheet will look. Click "Next". Select the "Column Data Format" option your preference for each text column. Click "Finish" to import the text file. Click "File" or the "Microsoft Office Button" and then "Save As." In Excel 2007 or 2010, select "Excel 97-2003" Book "from" Save As "Type" to save the document as an XLS file (because the native format for Excel 2007 and 2010 is XLSX). In previous versions of Excel, select "Excel." Click "Save". Load files like it? Share! All data loaded are deleted after 1 hour.
