When you're setting up a Google Account with a non-Google email, we'll send a verification code to the email address you used to create the account. If you don't verify your address, you won't be able to create a Google Account. Sign in to your email to verify your account While you're creating your account, you'll get an email from Google. Open the email and find the verification code. To finish creating your account, enter the verification code when prompted. To see if your account is verified, sign into your Google Account. If it hasn't been verified yet, you'll see a message asking you to verify your account. Fix problems with a verification link or email If you have problems with the verification link or email, follow the steps below. Didn't get verification email If you didn't get a verification email after you set up your account: Check your spam or bulk mail folder. If the email isn't there, add account-verification-noreply@google.com to your address book. Request a new verification email from your Google Account. Sign in. You may have to provide your email and password. If you created an account but haven't verified it, you'll find the message "Account verification needed." Click to send a new verification email. Tip: If you can't sign in to your Google Account, you might've entered a typo in your email address when you created your account or tried to sign in. With the right email address, you can create your Google Account again. Verification link doesn't work If you click the link and it doesn't work: Copy the entire URL. Paste the URL into your browser's address bar. Click Enter. If the link expired, request a new link. Go to your Google Account. Select Sign in. Enter your email and your password. If you don't remember your password, make your best guess. Click to send a new verification email. Post to the help community Get answers from community members You can get apps, games, and digital content for your device using the Google Play Store app. The Play Store app comes pre-installed on Android devices that support Google Play, and can be downloaded on some Chromebooks. On your device, go to the Apps section. Tap Google Play Store . The app will open and you can search and browse for content to download. If you have issues locating the Play Store app, or opening, loading or downloading content in the app, it could be due to a number of reasons. To troubleshoot these issues, try the following topics: I can't find the Play Store App The Play Store doesn't open or load any content Downloads from the Play Store don't work Post to the help community Get answers from community members
